Mint of the United States at Philadelphia,

MELTING AND REFINING DEPARTMENT,

Philadelphia, Aug 6th, 1888.

Hon A. C. Hickok

Acting Superintendent

Sir

Referring to the letter of Mr. Supt. Garrard of the Mint of the U.S. at Carson, I beg to say that we have a small number of Pots of German make, not needed for immediate use, of which we could spare him two for his accommodation. They are perfect in condition except defect in the handles, but are as good as many that we have in use. If the Refiner at Carson wishes to boil granulations, these are the only pots which we can recommend, but for all other purposes, such as washing gold &c, we use the Remmey pot made in Phila.

Of them, we have a full stock and can spare any number likely to be asked for. The cost of them is much less than the German pot, and seem to serve equally well for all purposes other than boiling formulations.

Very Respectfully

D. K. Tuttle
